

## NURSERY

We have had a wonderful time in Nursery! In Character we have been discussing what we would like to be when we grow up and why. In Maths we have been consolidating our understanding of number and writing the numbers 0, 1, 2 and 3. We also learnt all about Chinese New Year. We discussed that it was the year of the Rabbit and we made some Chinese lanterns.

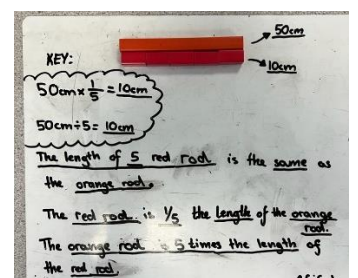

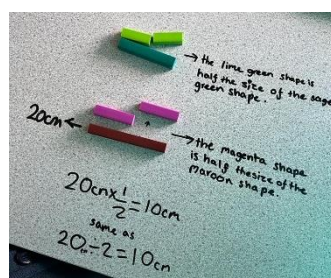

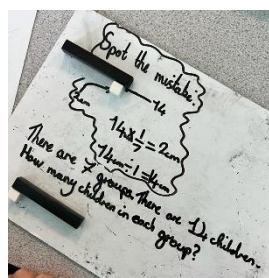

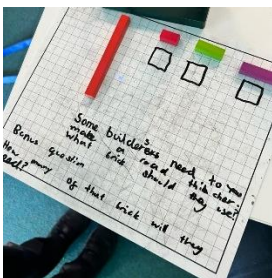

## YEAR 4

In Maths, we explored the patterns in the 5, 7 and 9 times tables. We discovered that the products alternate between odd and even! In Character, we learned about Respect and how you can show it in the context of watching a performance. We split into groups and learned a short play called 'Everyone Knows What the Dragon Looks Like!' before performing it in front of the other groups. The actors used their Confident Voices and the audience tried really hard to show Self Control and Dignity whilst they waited for their turn. In English, we have been writing diary entries based on our class text 'Varjak Paw'. Here is a 'purr-fect' piece of writing from Inaya!

## YEAR 5

Here are some pictures of a Maths lesson where we used concrete manipulatives to support deepening our understanding in the concept of scaling. We used this exploration of the concept to develop the stem 'when you multiply a whole number by a unit fraction, it is the same as dividing by the denominator'.

# YEAR 3

In Year 3, we have been immersing ourselves in the Art of Ancient Egypt. Before half term, we created versions of Nefertiti's collar. We also took our English learning outdoors and exercised teamwork to create our own explanation text entitled "How to Get to Hogwarts" using chalk on the playground! The children had a brilliant time creating these and really demonstrated their extraordinary creativity. We then held a competition to see which group could include the most subordinate clauses within their explanation.

# YEAR 1

Year 1 have been learning about weather in the first half of the Spring Term. We have looked at the seasons, cloud types and types of weather such as precipitation. We learnt that you can use a rain gauge to measure the amount of rainfall and how to record weather data in a graph. We even got to pretend we were meteorologists by creating and performing our very own weather forecasts!

In Geography, we have been learning about the United Kingdom. We have learnt that the UK is made up of England, Northern Ireland, Scotland and Wales. We have looked at atlases and maps of both the UK and our local area. We know that the word 'union' means together.

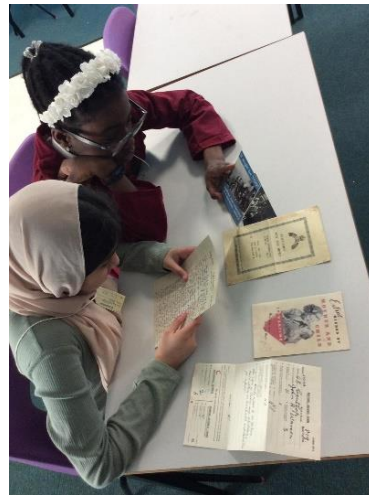

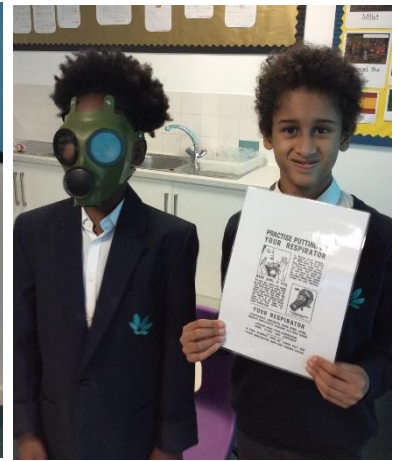

# YEAR 2

Year 2 had an experience day for our History topic, the Romans. A Roman expert came in and talked to us about the history of the Romans including where they lived, and what life was like during that period. We were fully immersed in the day as we dressed up as Romans as well! The Roman expert shared stories of the Roman times and we were able to ask some questions that we had. Some of the highlights of our day were when we played a Roman food game to test our knowledge of foods that Romans ate, and re-enacting a battle that Boudicca had led. We also learnt lots of facts about the weapons and armoury that they used. Take a look at our wonderful pictures!

# YEAR 6

Y6 had an Evacuee Theme Day linked to their history learning. Pupils dressed as evacuees, wrote letters home following some drama, explored different sources and replicas to help understand what life was like and even completed some ration cooking!

# RECEPTION

Before half term Reception were learning about transport. As part of this topic we created our own boats and placed them in water to see if they would float or sink.
